

Superintendent Leadership Quality Standard:

PRACTICE PROFILE

The Superintendent Leadership Quality Standard (SLQS) is described by competencies superintendents are required to demonstrate in their professional practice. Each competency includes indicators designed to provide illustrative examples of competent leadership practice.

Indicators are actions that are likely to lead to the achievement of the competency and which, together with the competency, are measurable and observable.

This profile tool is intended to frame your reflection on your practice, based on the indicators for each competency from Alberta Education's SLQS. Additional indicators representative of your context, your practice and your plans for growth may be added. Indicators may also be representative of Alberta stories of practice and/or emerging research.

One additional construct, based on the Alberta context and members' needs, has been added to the CASS Practice Profile. This construct, following the required

Alberta Education SLQS competencies, is framed around the conditions represented in the CASS workplace wellness framework. System leaders are more likely to meet the professional practice standard when they are well.

The Superintendent Leadership Quality Standard

Quality superintendent leadership occurs when the superintendent's ongoing analysis of the context, and the superintendent's decisions about what leadership knowledge and abilities to apply, result in quality school leadership, quality teaching and optimum learning for all students in the school authority.

A suggested approach for using this tool:

Evidence in Practice

- Review the indicators for each competency highlighting ones that represent practices you demonstrate.
- Identify those practices you demonstrate in the "Evidence in Practice" column. (Are the practices observable? Are they measurable?)
- If you currently demonstrate a practice that is not described in the Alberta Education indicators, consider adding it to the indicator column. A "•" is provided at the end of the list of AE indicators to imply opportunity to add to the list.
- Additional indicators that represent your context based on examples of practice shared in the "Evidence in Practice" column may also be added.

Areas for Growth

- Reflect on your practice and use the SLQS indicators or your own indicators to assist you in identifying areas for growth.
- Areas of growth should be supported by observations and measures of practice.
- You may choose to add additional indicators based on Alberta stories of practice and/or emerging research that identify areas in which you would like to grow.
- The development of a professional learning and implementation plan for the areas of growth you identify can be informed by system level planning tools available at <https://cassalberta.ca/planning-for-implementation/>

CASS Workplace Wellness Framework

System leaders are more likely to meet the professional practice standard when they are well.

Well-being: Integrates mental and physical health through improved dimensions of physical, mental, and social emotional states.

The role of system leaders includes supporting themselves, school leaders, teachers, other staff, and students. A comprehensive and integrated workplace wellness plan will address the well-being needs of all involved in supporting optimum learning for students in Alberta.

CASS incorporated the wellness image alongside the standard to reinforce the importance of having the wellness capacity to meet the professional practice standard. The following conditions from the CASS workplace wellness framework are intended to address personal and system workplace wellness.
